

International Coordinating Council of Aerospace Industries Associations

ICCAIA brings together international aerospace industry associations to create a global community of over three thousand companies engaged in the design, development, manufacture and in-service support of aeronautical and space products and technologies, including ground-based systems and services.

Our **mission** is to foster the growth of the world's aerospace manufacturing industry by:

- Supporting the development of effective standards for safe, secure, and efficient air transport
- Growing international civil aviation capacity
- Harmonizing civil aviation policies and regulations to the maximum degree possible
- Providing technical expertise

Our Priorities

Through their membership of ICCAIA, associations can ensure that their members are represented in global policy decisions and their voices are heard on the international stage. As a recognized observer at the International Civil Organization (ICAO), ICCAIA brings the views of the manufacturing and services community directly to global policymakers, providing opportunities for participation in key ICAO events, panels and working groups. Our members bring their expertise to over fifty ICAO groups and panels on topics including Airworthiness, Communication, Navigation and Surveillance/Air Traffic Management, Security, Environment and Sustainability, Facilitation and Health and Cybersecurity.

Benefits of Membership

- Highlighting local and regional challenges and opportunities
- Ensuring that manufacturers' views are heard when global policy is formulated
- Bringing together the world's experts to recommend new channels for development and innovation
- Providing a community to help and advise with ideas, issues and challenges
- Strengthening the global voice toward better, outcome focused, flexible regulation
- Advancing the agenda on sustainability, digitalization and innovation
